

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (currently amended) A kit for organizing a plurality of images provided by a customer on a plurality of hard copy prints, comprising;  
at least one order form to be completed by said customer for ordering of at least one good and/or service to be fulfilled by a service provider; and  
at least one instruction form for association with said plurality of hard copy prints provided by said customer for forwarding to said service provider for fulfillment of said order, said at least one instruction form having a machine readable code ~~capable of being machine read~~, said code providing information used in organizing digital images into groups or categories, said digital images obtained by scanning said hard copy prints.
2. (currently amended) A kit according to claim 1 further comprising instructions for the customer on how to use the kit.
3. (original) A kit according to claim 2 wherein said instructions are provided on a hard copy document.
4. (original) A kit according to claim 2 wherein said instructions are provided in an audio or visual format.
5. (currently amended) A kit according to claim 1 further comprising a holder for organizing said images obtained by scanning said hard copy prints by said service provider.
6. (currently amended) A kit according to claim 5 wherein said holder includes pockets for organizing said ~~images~~ hard copy prints and associating said instruction form with said plurality of hard copy prints.
7. (previously presented) A kit according to claim 5 wherein said holder comprises an envelope.

8. (currently amended) A kit according to claim 1 wherein said at least one instruction form is associated with a unique order instruction.

9. (currently amended) A kit according to claim 1 wherein said at least one instruction form comprises information to be associated with said images.

10. (currently amended) A kit according to claim 5 wherein said at least one instruction form includes a human readable order instruction which corresponds to said machine readable code.

11. (currently amended) A kit according to claim 1 wherein said machine readable code is provided in the form of an icon.

12. (original) A kit according to claim 1 wherein said kit further comprises a container for holding said plurality of images.

13. (original) A kit according to claim 12 wherein said container is provided with at least one section for holding images provided in other formats.

14. (original) A kit according to claim 13 wherein said at least one section is designed to hold one of the following image formats:

CD;  
film cassette;  
photo album;  
flash card;  
computer disk.

15. (previously presented) A kit according to claim 5 further comprising a pair of identical labels, one of said labels is used for keeping track of the pocket from which said hard copy prints were originally provided and the other of said pair of identical labels is provided on said plurality of hard copy

prints that were placed in said pocket from where said hard copy prints were originally provided.

16. (currently amended) A kit according to claim 1 further comprising a holder having a plurality of pockets for categorizing of said plurality of images provided by said customer.

17. (original) A kit according to claim 1 further comprising a carrier for holding one of said plurality of image for allowing automatic feeding of said one of said plurality of image through a scanning device.

18. (original) A kit according to claim 17 wherein said carrier comprises a support surface having adhesive layer for holding of said image.

19. (original) A kit according to claim 18 wherein said carrier further includes alignment marks for assisting in positioning said image on said carrier.

20. (previously presented) A kit according to claim 17 wherein said carrier comprises a retaining member located at one end of said carrier for securely holding said hard copy prints that are to be scanned.

21. (previously presented) A kit according to claim 1 further comprising a tool for use in determining the number of said image that is to be scanned.

22. (currently amended) A kit according to claim 1 wherein said machine readable code comprises a color ~~for said instruction form~~.

23. (previously presented) A kit according to claim 1 wherein said at least one instruction form having a size substantially the same as the size of said plurality of hard copy prints associated with said instruction form.

49. (withdrawn) A method for ordering of a kit for use in organizing images to be scanned, comprising the steps of:

connecting to an image service provider over a communication network;

filling out an electronic order form; said electronic order form having a list of selections that can be individually selected, wherein when one of said selections is selected a scannable label is generated for use in organizing said images.

50. (withdrawn) A method according to claim 49 wherein one of said selections allows the customizing of information provided on said label.

51. (withdrawn) A method for organizing a plurality of images provided on a plurality of hardcopy prints, said method comprising steps of:

- providing a kit having at least one order form for ordering at least one good and/or service with respect to said images provided on said plurality of hardcopy prints;
- providing at least one instruction form for associating with said plurality of hardcopy prints, said at least one instruction form having machine readable code that provides information for use in organizing said images provided on said plurality hardcopy prints;
- scanning said plurality of images provided on said plurality of hardcopy prints so as to obtain a plurality of digital images;
- machine reading said code; and
- organizing said digital images in response to said instructions provided by said code.

52. (withdrawn) A method according to claim 51 further providing a plurality of instruction forms each having a different code and are associated with different groups of said plurality of hardcopy prints.
